Document Management System is Browser Based and Customizable

Waltham, MA 2005...Blue Robin, Inc. a leader in building customized eBusiness infrastructures, announces that the company has released their new Document Management System. Blue Robin's Document / File Management Systems (DMS) provides a familiar web-based environment, similar to MS Windows' file management, for authorized users to upload and manage documents, PDF's, video, audio files and more.

Blue Robin's DMS is customizable to your specific requirements, easy to use and affordable. Users can easily search online, find and revise documents in real-time while reducing operating costs of ink, toner, paper, FedEx, postage costs and most importantly, time.

With Blue Robin's DMS, users can edit existing documents in the system, or create new documents. Documents and files are managed and uploaded via our online console that allows administrators to set the user level access on a per-user level. Our powerful servers store all content in a secure environment so only authenticated individuals have access to the system.

Features of Blue Robin's DMS include:; Search, find, and revise documents; Access, download/upload, and manage documents using online console; Create newer versions of documents ; Administrators to set the User-level access on a per-user level; Keep track of all the versions of a file, and time stamped history of changes; Optional workflow for approval and sign-off; Ability to associate (link) documents to a certain to page(s) within a website; The content indexed by a powerful search engine; Completely delete single or multiple content records (HTML, PDF, image, and others).

About Blue Robin, Inc.

Blue Robin is a leading eBusiness Infrastructure developer and can design, develop, implement, and support eBusiness infrastructures that combine data, voice, and video, utilizing the latest and the greatest hardware and software technology in diverse operating environments.
