## **Porcelain Patch Implements EnterpriseVoIP Phone System Company Wide**

**Waltham, MA - February 2007 - Blue Robin, Inc.**, announces that Porcelain Patch and Glaze Corporation of America has implemented Blue Robin's EnterpriseVoIP phone system company wide. Since 1938, [Porcelain Patch and Glaze](#) has been providing the highest grade of electrostatic painting and porcelain re-glazing services to businesses as well as homeowners all across New England.

When asked why he chose Blue Robin's EnterpriseVoip phone system, Jonathan Gleason, President of Porcelain Patch and Glaze said, "Cost, cost and cost. The new VoIP phone system was much less expensive to install than a traditional PBX and it has been far cheaper month to month than paying the large phone bills we used to have."

EnterpriseVoIP is Blue Robin's Digital T1-Based Managed Telecommunications Service (T1-MTS) that offers IP Phone systems complete with all the standard PBX-based feature sets, local/long distance dialing, and web/email/database hosting services. It is a one-source, full-service approach that delivers to their clients' business-class voice and data services (all in digital) that were recently accessible and affordable only by Fortune 500 and other large enterprises.

"We are pleased to supply Porcelain Patch and Glaze our EnterpriseVoIP Managed Telecommunications Services. It is always satisfying when we are able to offer such a sophisticated phone system to our clients and help them lower their operating costs. Knowing that Porcelain Patch has a VoIP phone system that is equal to the ones used by Fortune 500 companies, but at a much lower acquisition cost, is very rewarding to us," states Earl Gray IV, President and CTO of Blue Robin.
